

Silica Booster

A pelletised composted poultry manure with added silica for enhanced soil health and plant performance. Silica assists in growing healthier stronger plants for increased yield, environmental stress resilience and resistance to pest infestation. Soils also benefit from the addition of silica with improved chemistry, microbiology and water holding capacity.

Product Information

While most operators understand the benefits of composted chicken manure through enhanced soil carbon, microbiology, natural slow release nutrients; the role of silica in plant performance, soil microbiology/chemistry and resilience to environmental stress is beginning to be better understood.

Silica in enhanced plant performance

- Stronger cell walls
- Healthier, thicker leaves
- Enhanced root activity
- Increased flower numbers and pollen production
- Higher fruit sugar content

Silica in enhanced soil microbiology / chemistry

- Improved cation exchange
- Natural anti-fungal properties
- Increased nutrient availability
- Harbourage for microbes

Silica in enhanced environmental stress resistance

- Retains up to 120% volume of moisture- natural water bank
- Helps offset effects of heavy metal and salinity
- Stronger roots / leaves for increased moisture capture/retention
- Stronger healthier plants increase resistance to disease/pest attack

Not all silica is the same (Total vs Plant Available)

Not all silica is the same - look further than total silica results. Only plant available silica is readily absorbed by plants, the remainder may remain locked away in the soil.

Silica Booster contains plant available silica which is naturally occurring in our Diatomaceous Earth.

The benefits of using an organic fertiliser include:

- slow release nutrients that feed plants over many months
- increased worm activity
- improved water retention and aeration
- increased micro-organisms and beneficial bacteria
- no burnt or damaged plants
- pH neutral

Use it on:

- Tree crops
- Small crops
- Root crops
- Sugar cane
- Flowers
- Ornamentals
- Peanuts

Directions for use

Apply 1 - 2 tons per hectare (100-200 grams per square metre) depending on soil conditions and crop. For best results, apply water.

Storage

Store under cover and away from moisture. Store out of reach of pets and avoid consumption.

Bag Size

25 kg

1000 kg

Silica Booster

Product Information *continued...*

Typical Analysis*:

Nitrogen (N)	Available	3.40 %
Phosphorous (P)	Available	1.49 %
Potassium (K)	Available	2.85 %
Effective Cation Exchange Capacity	cmol+ /kg	50.32 %

Silica and Trace Elements*:

Silica (% SiO₂)	Available /Soluble	39 %
Calcium	Available	2.96 %
Magnesium	Available	0.80 %
Zinc	Available	0.0509 %
Boron	Available	0.057 %
Iron	Available	0.4471 %
Copper	Available	0.0167 %
Manganese	Available	0.0668 %
Carbon	Available	34.81 %
Sulphur	Available	0.60 %
Molybdenum	Available	0.00120 %
Cobalt	Available	0.00241 %
pH	Available	7.07 %
